

Origo A200 & A100 Alcohol Stoves

Built-In Alcohol Stoves With Electric Ignition

Origo A200 with glass lid (left) and A100 (above)

Round off a perfect day on the water with an Origo A100 or A200 built-in alcohol stove with electric ignition.

Origo A200 double-burner and A100 single-burner stoves are designed for easy built-in installation. Both units feature 12V ignition, so there is no need for matches or a lighter. The stainless-steel surface simplifies cleaning and guarantees durability.

Origo alcohol stoves are easy to fill. Each alcohol-fueled container holds 40 oz. (1.2 liters) of alcohol fuel. Pour the fuel into the container where it is absorbed by the non-flammable material inside. A full container provides about four-and-a-half hours of cooking time at the maximum setting, or about 10 hours at normal setting before refilling is required.

Origo units are environmentally friendly and extremely safe. The denatured alcohol-fuel is a clean and renewable energy source, and eliminates the need for fuel lines or gas bottles that could leak or explode. The stainless-steel alcohol fuel containers will not leak if deformed by impact or if turned upside down.

Just like cooking at home. Light the burner and adjust the flame with the regulator knob. The flame diffuser spreads the heat over the base of the burner pan, giving 7,000 BTU/hr. (2,000 watts) at full heat. These Origo units can bring 34 oz. (1 liter) of water to a boil in 10 minutes. It's as efficient as cooking with gas, yet much safer and cleaner.

Key Benefits

- Built-in 12V lighter eliminates need for matches or a lighter.
- Significantly smaller than competing models means more counter space.
- Brings 34 oz. (1 liter) of water to a boil in 10 minutes.
- Easy-to-clean stainless-steel surface.
- New styling is simple and easy to use.
- Pressure-free alcohol offers a safe way to cook on board.
- Easy installation – just two screws required.
- Available with or without glass lid.

Technical Specifications for Origo A200 & A100 Alcohol Stoves

Model	No. of Burners	Fuel	Cooking Power ⁽¹⁾ (BTU/hr/Watts)	Alcohol-Fuel Container Capacity (oz./liters)	Unit Dimensions (in/mm)			Cut-Out Dimensions (in/mm)		
					Height	Width	Depth	Height	Width	Depth
Origo A200	2	Alcohol	7,000/2,000	40.0/1.2	6.31/160	19.69/500	14.38/365	5.94/150	19.13/485	13.38/340
Origo A100	1	Alcohol	7,000/2,000	40.0/1.2	6.31/160	10.63/270	14.38/365	5.94/150	10.06/255	13.38/340

Notes:

⁽¹⁾ Cooking time approx. 4.5 hours at maximum setting and 10 hours at normal setting.

Accessories for Origo A200 & A100

Smart Fuel

Dometic provides denatured alcohol (methylated spirits) fuel which burns with no odor or soot deposits. Alcohol fuel is used in combination with Origo's fuel containers (shown above).

Pot Holders

Origo pot holders fit into pre-made holes and clamp your pots and pans securely to the top of your Origo stove. They are easy to adjust and prevent pots from shifting or falling.

Glass Lids

Equip your Origo stove with an elegant cover in black toughened glass. Fitted with self-locking hinges at the rear edge, they are available for single- and double-burner units.
